RE: Equipment Storage Facility
Mason City, Iowa

Dear Bill:

This letter serves as verification that the proposed Equipment Storage Facility for the City of Mason City will meet the current state building energy code, as required for the I-JOBS Local Infrastructure Program application. The proposed structure will be a pre-fabricated insulated metal building with a radiant tube heating system. This structure is proposed to have a total volume greater than 100,000 cubic feet, and therefore will need an architect/engineer review for energy efficiency per Chapter 303 of the current State Building Code. We intend to include the architect/engineer review and certification as part of the requirements for the project's Contract Documents, to be completed by either the installation contractor or the building manufacturer.

We do not intend to require that the proposed Equipment Storage Facility meet current Energy Star standards, due to the proposed building being primarily for vehicle and equipment storage and that minimal occupancy by City employees is expected.

Please contact me if you have any questions.

Sincerely,

WHKS & Co.

William K. Angerman, P.E.
